Name: ....

Hot, sweaty, summer days being constricted by the ugliest thing in the world, swallowing you whole in the heat of the day. Everywhere you hear teachers saying that's not uniform, but do you really want to wear the uniform?

100's and 100's of dollars spent on pointless uniforms that are replaced year after year. Most people think that school uniforms cut down the amount of bullying, but no matter what children always find a way to pick others, and some people not having enough money for the uniform can make things worse. In reality the push for school uniforms is driven by commercial intrests rather than educational ones.

For some children wearing a school uniform can lead to things

Name: _____

like insecurity and self conscious-
ness all because they aren't
comfortable or think they don't look
good in these dreaded school uniforms.
It can be a major problem for some
students and I'm sure that no
parent would ever want their
child to feel so uncomfortable.

School uniforms take away the
magnificent artistic nature and
individuality children have and
express through words, actions
and especially the way they dress.
It holds them in and limits how they
can express themselves as people
in their daily lives. Their individu-
ality is restricted as each and
every child wears the same thing
as their classmates.

Dose wearing school uniforms make
the classroom a better place, do

Name: _____

they make every child feel unique and special or do they decrease the amount of bullying that goes on? No, so why should everyone force children to wear things they aren't comfortable in and things that restrict them in their words, actions and thoughts. Dose making children uncomfortable come as a pleasure? Because I sure hope not, no one likes to be uncomfortable so why should kids suffer every day.
