Students Should Strike for Climate Change

Sizzle! Sizzle! Sizzle! That's the sound of me having a barbecue on the dark/black pavement.

I don't need a barbecue stand! Because Climate change is striking now! Starting from the 1880's

records have shown that the average temperature has risen one degree celsius every single year and

still rising from this day onwards. Our enemy is carbon dioxide and nothing can change that.

Students have to strike now or our future will vanish. Organise anything to the government, so we

can tell them how green house gas is killing our environment. How drought and carbon dioxide

contaminate our crops, wildlife and fresh water supplies. Just remember as Franklin D Roosevelt

once said, "A nation that destroys it's soils destroys itself, forests are the lungs of our land, purifying

the air and giving fresh strength to our people."

Students need to strike for the sake of our environment not to learn for the sake of our

minds. If you really think that students shouldn't strike, you're wrong, do you really want humans

to die? Green house gas is making our environment disappear and you know what happens

when trees vanish we die! Because we won't be able to breathe! All we're doing together is

making it worse, even our animals are suffering. All of the herbivores in our world will become

extinct and you, you will be the ones guilty! As Jah Insee once said, "we are the first generation

to feel the sting of climate change, and we are the last generation that can do something about

it." Make those words true and let students strike for climate change!

Students are the ones that can make a difference and are the only ones! If you haven't

experienced a flood before you'll be in for a big surprise, all of our polar animals are declining,

do you really want that? If students don't strike now we will have no future to see. There

Name: Aidan

are colossal problems with sea levels rising because of ice melting. We're suffering from our own cause but now we've made polar animals suffer too! All of us will be the ones with death on our hands. We can't take back the lives that we made suffer but we can make a difference. If we don't act now our future will be worse! "You cannot get through a single day without having an impact on the world around you. What you do makes a difference and you have to decide what kind of difference you want to make." said Jane Goodall. After this you must now know that we need to make a difference of global warming, make those words true for the sake of our world or water will take over.

This generation is the last to stop climate change. Let students strike now or we will lose our lives to our enemies, drought and carbon dioxide. These little problems contaminate not just our crops but our animals and fresh water supplies too. Our natural resources are depending on us and we are too. You don't want to lose the lives of the ones you love, do you? We're not just contaminating our supplies we're contaminating ourselves too! Because of poisoning, if we don't act now we will have no future not just for us but animals too. Remember this is the most important thing you've ever heard, as Albert Einstein once said, "The world will not be destroyed by those who do evil, but by those who watch them without doing anything." After this remember you are the cause of Earth's destruction! Not unless you help too.

My hair is like fire and my body's like lava, the earth is nothing but rock! There's no forests left for us to breathe, there's no water for us to drink and there's no food for us to eat. The sounds of laughter has dispersed in the air and all it is now is a free for all for supplies. We will be controlled by our enemy if students don't strike NOW! Our future will be nothing

Name: Aidan

if you don't strike today, remember forests are the lungs of our land and if it disappears
we will too!
